

MARAMA received the following questions about the posted Request for Proposals titled: Oil and Gas Workshop.

Q: Can you also indicate what the needs and expectations are related to the webinar reference as indicated on page 3 number 10?

A: There are no expectations for a webinar with this training. That reference was included in error.

Q: Can you please indicate if there is an estimated level of effort and budget range?

A: Materials should be prepared for a training event lasting 1 ½ days or about 12 hours total. We leave it up to the proposer's judgment to offer a good balance of effort to incremental improvement to the training experience. Your proposal should indicate your expectation of effort involved so that we can judge the value. MARAMA prefers not to establish a target for level of effort or budget range for the training at this time
