

Additional Summary of Stakeholder Comments on the Construction Management TSD

September 7, 2006

The MANE-VU Construction Management TSD was sent out for a final review and 'OK' from the TSC and they were invited to comment from September 5th to September 20th. Three stakeholders commented on the template and their comments are summarized here.

Overall Document

The state of New York had specific comments and changes to the document. In response to these comments all of the suggested changes were made

Section 3: Relevant Emissions Inventory Results

Tables 1 and 2

In Tables 1 and 2, the state of Delaware has an asterisk next to it stating that '*Delaware's emissions are for fugitive dust only.' On a 9/7 phone call Jack Sipple of Delaware requested that this asterisk be removed. I will follow up and see why it was put there in the first place.

In response to this request the asterisk as removed.

Tables 3 and 4

The District of Columbia had concerns about the data used in Tables 3 and 4. In response to these comments the SCCs that were used to derive the data were added to the tables.

The District of Columbia also suggested specific changes to titles and wording in Tables 3 and 4. In response to these comments the titles and wording in the tables were changed.
