MARAMA Information

Biographies of the Instructors:

Kevin Black

Kevin Black is an Air Quality Specialist with FHWA's Resource Center in Baltimore, Maryland. He works on technical issues including air quality impact analysis associated with highway programs, MOVES model applications, air quality monitoring related to EPA's near road monitor network, FHWA's CMAQ program and other transportation-related air quality issues. He provides training and technical assistance through courses that include FHWA's Air Quality Fundamentals Course, FHWA's Air Quality Benefits Analysis Course, FHWA's MySQL Course, EPA's MOVES Model Course, and through webinars. He is the coordinator for the Northern Transportation and Air Quality Summit (NTAQS) and assists in the coordination of the Southern Transportation and Air Quality Summit, yearly meetings covering transportation-related air quality issues. Kevin is a member of TRB's Regional Emissions Subcommittee, TRB's Project Level Subcommittee, and a member of the Coordinating Research Council's (CRC) Real World Emission Committee where he provides support for establishing research needs. In addition to his participation with TRB and CRC, he is a member of Air and Waste Management Association, American Society of Civil Engineers, and Institute of Transportation Engineers. His educational background includes a BA in Geography from George Mason University, a BS in Civil Engineering from Virginia Tech, and a MS in Civil and Environmental Engineering from George Mason University.
